**ELECTION/RESTRICTION**

**1.** **Claim(s) 1-13** is/are pending.

**ELECTION/RESTRICTION**

**2.** Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-6** drawn to a method of analyzing a target polynucleotide consisting of repetitive and non-repetitive sequences, classified in Class 435, subclass 6.

II. **Claims 7-13** drawn to polynucleotide hybridization probes, classified in Class 536, subclass 23.1 and 24.3.

**3.** The inventions are distinct, each from the other for the following reasons.

**Inventions I and II** are related as a process of use and a product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used as a molecular weight marker in gel electrophoresis.

**4.** Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the necessity for non-coextensive literature and sequence searches, restriction for examination purposes as indicated is proper.

Art Unit: 1634

**5.** Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
